DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.
2. Claims 1-7 are rejected under 35 U.S.C. 103(a) as being unpatentable over Barker et al in view of Forte et al.

Barker et al show an electrochemical cell "system" with opposed planar electrode members (col. 3, lines 20-50) composed of a polymeric matrix composition. (Col. 5, lines 30-68).

As for claims 2-4, and 7, plasticizers are disclosed at col. 6, lines 15-42, e.g., (propylene carbonate)

As for claim 6, hexafluoropropylene is disclosed in the reference at col. 5, lines 57-58.

Barker et al do not show matted fiber paper.

Forte et al show a separator between electrode plates (planar) in which the separator is composed of mats or papers of glass fibers, e.g., mats or papers with a fibrous structure.

It would be considered within the skill of the art to substitute any of the separator materials of the secondary reference for the separator materials of the primary reference because the secondary reference materials are shown to be equivalent to

Art Unit: 1742

those of the materials in the primary reference and such substitution would not appear to provide any unexpected results.

Election/Restrictions

3. Claims 8-19 have been withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on 11/24/03.
